METROPOLITAN CITY

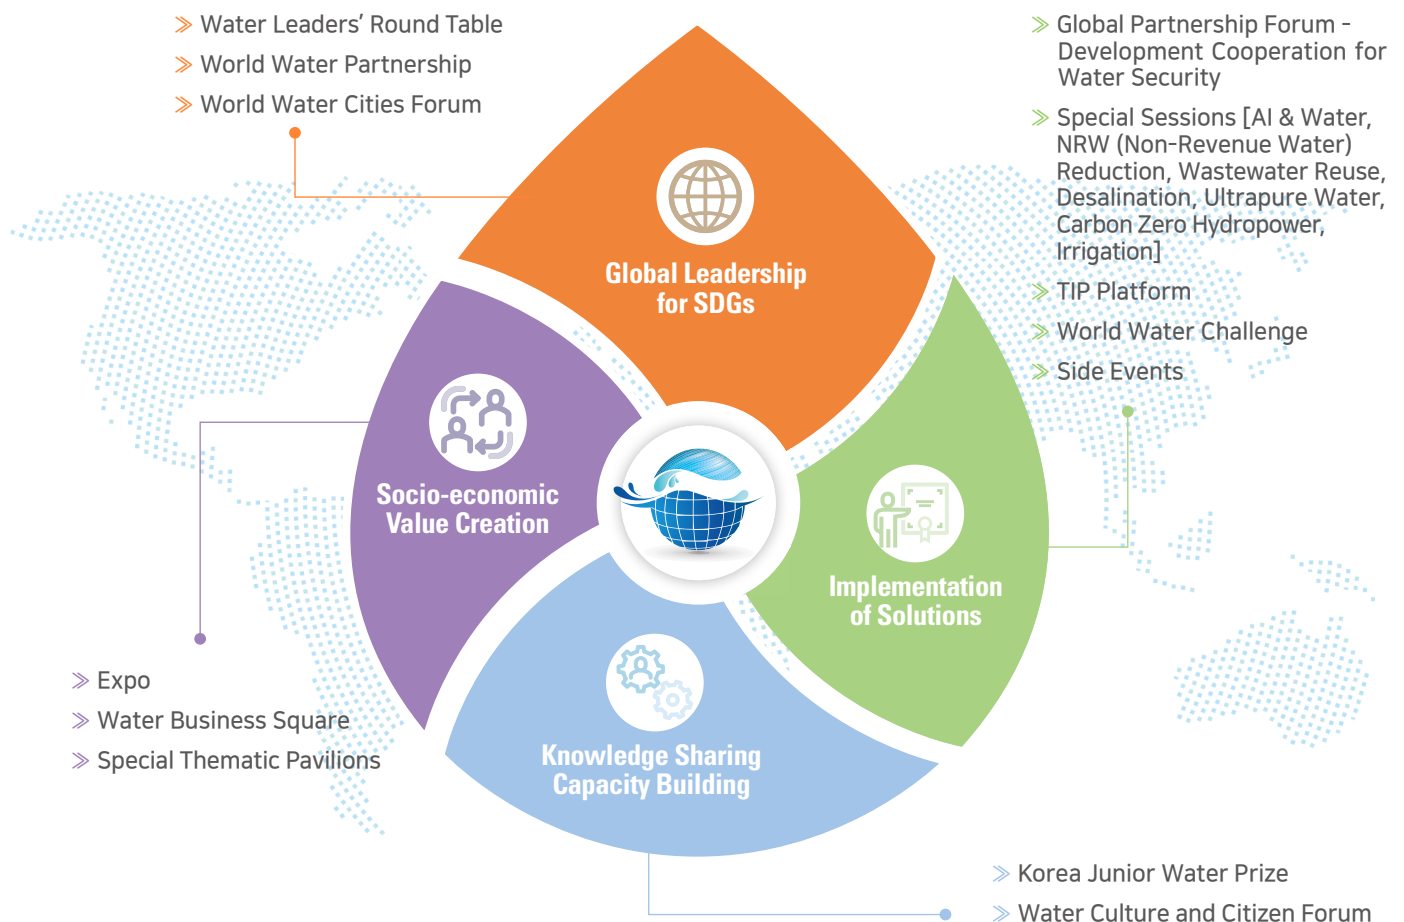

Korea Environment Corporation

Organizer

KOREA WATER FORUM

Since 2016, as a follow-up to the 7th World Water Forum held in Korea, Korea International Water Week (KIWW) has been playing a pivotal role in connecting policies with practice and link technologies with implementation, by engaging central and local governments, businesses, NGOs, academia, research institutes, and citizens. This year KIWW2025 prepares 10th year Commemorative Special Programs in combination with thematic pavilions at Water Expo including "**Global Partnership Forum - Development Cooperation for Water Security**" as a co-creating arena for multilateral partnership by presenting various important water projects globally enhancing water security and partnership through international development cooperation funding among diverse stakeholders.

KIWW2024 highlights

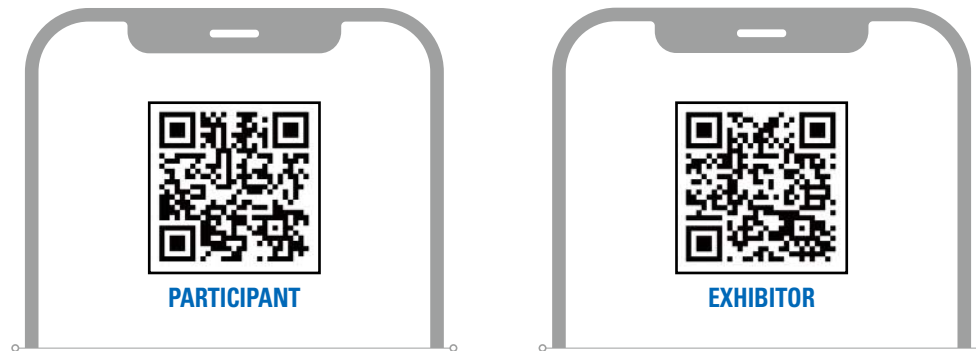

KIWW2024, under the main theme of "Building Smart Water Future by Sharing Experience and Technology" and the sub-theme of "Digital Stream – Navigating towards the Future for Water", brought together more than 12,000 participants from 52 countries. Global leaders shared their visions and commitment at the Water Leaders' Round Table, while innovative solutions and ideas were presented through the World Water Challenge and TIP Platform sessions as well as 20 special sessions and side events. Water EXPO featured 76 companies engaging in business matchmaking with international buyers.
