6	Rep. of Korea (7 <sup>th</sup> )	Prof. Soontak Lee	World Water Council	
7	Brazil (8 <sup>th</sup> )	Dr. Jorge Enoch F. Werneck Lima	Embrapa, Ministry of Agriculture, Livestock and Food Supply	

The representatives from host countries of the previous and prospect World Water Forums discussed the results and future agendas of World Water Fora. Global water security on quantity, quality, ecosystem, climate change, and economy through the partnership was mentioned throughout the meeting.

In parallel to 6<sup>th</sup> and 17<sup>th</sup> Sustainable Development Goals – “Ensure availability and sustainable management of water and sanitation for all”, “Strengthen the means of implementation and revitalize the global partnership for sustainable development” – the participants agreed on the need to build a consensus and lead the global agenda on the International partnership on water security.

Furthermore, the participants agreed upon the Action Declaration after sharing ideas and reviewing the draft. These include:

- Adapt to Climate Change: Managing Risk and Uncertainty for Resilience and Disaster Preparedness
- Strengthen Equitable Participatory and Accountable Water Governance
- Engage in Socio-Economic Development and Activities such as energy, transport, industry, tourism, etc.

*“Water security is a part of human security. For this, we should start from something tangible, regardless of the size of the initiative. This does not always have to be related to financing. We have political leverage here ... we can suggest our opinions to the ministers for future policies.” (Ahmet Saatci, Turkey)*

*“The International world, I think, is not to be discussed but to be constructed with other countries. Therefore, we need to build a concrete structure on the World Water Partnership, bringing continuity between the Fora.” (Jorge Enoch F. Werneck Lima, Brazil)*
